

It's time for a change

Conventional bandages

Permeable

- Absorbs water (increased risk of wound contamination)

Impractical

- Constant re-wrapping
- Susceptible to animal chewing and removal
- Must remove to inspect wound

Limited application sites

- Ill suited for ears, tails, joints

Daily bandage changes

1 application = Up to 14 days of wound protection

The SutureSeal advantage

Sealed for Healing

- Protects from contamination
- Permits airflow
- Water resistant

Sealed for Protection

- Lick and chew resistant
- Durable: lasts up to 2 weeks
- Protects wounds on ears, joints, tails
- Transparent: allows for inspection

Sealed for Safety

- Non-Toxic
- Biodegrades in 2 weeks
- Flexible: allows joint movement

 Get them back in the water again...

The Optimal wound sealant

- **Safety:** Non-toxic and Biodegradable
- **Protection:** Water resistant and 1 application lasts up to 14 days
- **Healing:** Transparent – Allows for inspection of the wound Permits airflow, while keeping contaminants out
